

## Is Manual Packaging of Sugar is a bottleneck for High Productivity!!

Gone are the days of manual feeding of sugar in bags & wasting sugar in shifting to weighing scales due to spillages & leaks, stresses due to manual involvement, inaccuracy in weighing & finally making this process a bottleneck to achieve the required production rates.

We introduce VT Corp as renowned manufacturer of Packing Machinery under the well known Brand VIPINCHANDRA. With installation base of more than 500 systems in varied industrial segment of Sugar, Food grains Cement, Powders, food industry, paints & pigments, sponge iron & many more... VT Corp today is the leader in the field of weighing and bagging systems in India & abroad.

Electronic Bagging Machine

Electronic Stationary-Packer

We have innovated Customized Bagging Plant for Sugar industry on turnkey basis with end benefits like:

- Complete Automations
- Accuracy in weighing up to 0.05%
- No wastage or spillage
- Manpower reduction
- Very less floor space area required
- Auto stitching system with conveyor
